## Configuration of As 400 to print to a Canon IR / RIP

## Ping the IP address of the Image Runner

At the console type

Ping "ip\_address" (Don't forget the quotes)

Make sure HOSTPRINT Services are running. This transforms SCS into ASCII

Edit the Host file – to do this you need to Log in with the Security Officer Password. At the Console shown below at the Prompt type

### CFGTCP

Select option 10

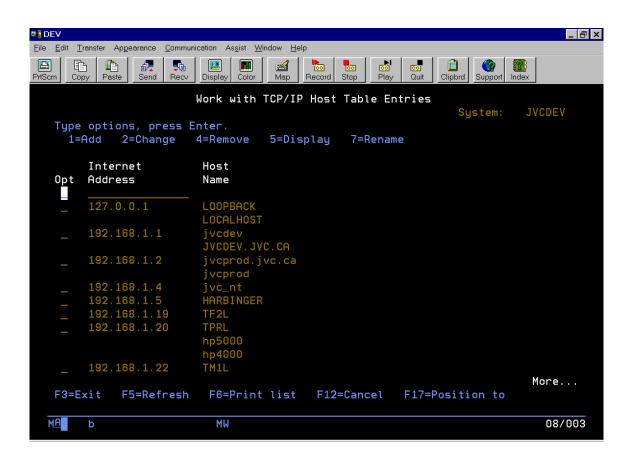

#### Work with TCP/IP host table entries

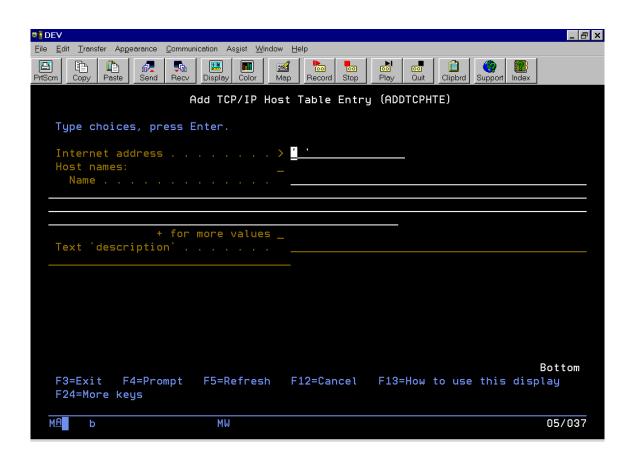

DEV e Edit Transfer Appearance Communication Assist Window Help	
	Ouit     Clipbrd     Support     Index
CFGTCP Configure TCP/IP	
	System: JVCDEV
Select one of the following:	
<ol> <li>Work with TCP/IP interfaces</li> <li>Work with TCP/IP routes</li> </ol>	
<ol> <li>Work with TCP/IP routes</li> <li>Change TCP/IP attributes</li> </ol>	
<ol> <li>Change TCP/IP attributes</li> <li>4. Work with TCP/IP port restrictions</li> </ol>	
5. Work with TCP/IP remote system information	
10. Work with TCP/IP host table entries	
11. Merge TCP/IP host table	
12. Change TCP/IP domain information	
20. Configure TCP/IP applications	
21. Configure related tables	
22. Configure point-to-point TCP/IP	
Selection or command	
F3=Exit F4=Prompt F9=Retrieve F12=Cancel	
M£ b	21/007

At the Console shown below select option 2

### Change

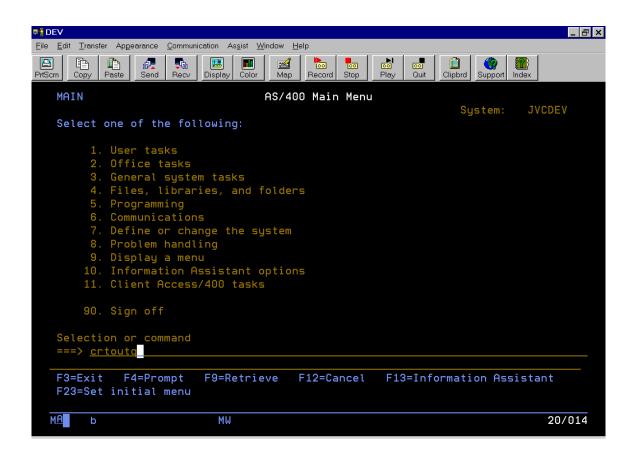

This will enable you to Add or Change the host table entries.

4. At the console shown above type the IP Address and Host name from the host file

Save the settings and exit to the main console.

1. At the main console type

### CRTOUTQ (Press F4 Key this will prompt you for info)

This will create an out queue.

2. At the console shown below complete the info as indicated below.

Output queue ...... > My Printer (This name is an alias and can be anything)

Library .....> SPOOL (This is the name of the spool directory)

Remote System .....> Host\_Name (This is the entry in the hosts file)

Press F10 for additional parameters

Remote Printer Queue ......> print (Make sure print is within quotation marks "print")
